Install the Tripkicks SAFARI Browser Extension for MAC OS in a Managed Environment

The Tripkicks Extension can be centrally distributed to Mac devices using Apple Business Manager and a Mobile Device Management (MDM) system.

Step 1 – Locate the Tripkicks Extension within Apple Business Manager.

- NOTE that the Tripkicks Safari Extension is an "Unlisted" app, so it is not searchable within the Mac App Store.
- To locate Tripkicks extension, paste the following full URL within the search window:

https://apps.apple.com/app/tripkicks-extension/id6448952786

	pple.com#/main/appsandbooks		
∉Business ④ Subscription	C https://apps.apple.com/app. X 🕞 1 Total	Tripkicks Extension

Devices		Price Quantity Credit Card	
Assignment History		\$0.00 0 Card ending with 1002	
Apps and Books		Total Cost \$0.00 Get	

Step 2 – Select the Number of Licenses to be Added and Proceed to Check Out

- Identify the number of licenses / endpoints that you require.
- All licenses for Tripkicks within Apple Business Manager are \$0. Add as many as required.

Step 3 – Using your MDM that is Connected to Apple Business Manager, you can Distribute the Extension.

 If this is the first time you're using an MDM to deploy an Mac App, your MDM needs to be connected to the Apps and Books in Apple Business Manager by downloading the token from Apple Business Manager. You can find that in Preferences>Payments and Billing>Apps and Books>Content Tokens
