

Hi,

I wanted to make you aware that we are adding Tripkicks as a new component to our travel program.

Tripkicks is a partner of SAP Concur that shows a variety of actionable travel insights, including entry and quarantine restrictions, Covid-19 data, additional supplier information, and other key data points within Concur Travel. This information is presented upon searching for flights and hotels within your Concur Search Results.

Tripkicks will be made available to employees on [\[insert date\]](#). Tripkicks leverages a browser extension to display information in Concur Travel and is compatible with Google Chrome and Microsoft Edge. To get started, travelers will need to add the Tripkicks Extension to [Chrome](#), or [Edge](#). More resources, and detailed activation instructions found in the [Tripkicks Traveler Launch Portal](#).

We are pleased to provide a resource that will assist employees in navigating the complexities of travel and empower them with the information required to make the best decisions!

Please let me know if you have any questions.

Thanks,
